Technical Qualifying Criteria

The bidder should carry out below listed bench mark programs:

1. HPL 2.2 benchmark (see <http://www.netlib.org/benchmark/hpl/>)
 2. GROMACS (www.gromacs.org) benchmark. For this, the benchmark files in tar, zipped form may be obtained from the following website. Please download, untar and follow the instructions carefully.
https://drive.google.com/drive/folders/OBw_FWdWPlasXME9Scmxia29XYmM
- The HPL and GROMACS benchmarks should be carried out using all 32 cores available on a single node.
 - For the HPL benchmark, we will consider the ratio of the sustained vs. theoretical peak.

A following criteria would be used for technically qualifying the vendors.

1. A minimum of 73% is acceptable for the HPL benchmarks.
2. If (1) is satisfied, the benchmarks for GROMACS will be considered. Vendors will be considered further for benchmark comparisons in terms of efficiency. Only those vendors whose benchmark results are within 10 % of the best one will qualify for the commercial bid
