PATCH CORD**

TECHNICAL QUERIES AND CLARIFICATION

TENDER NUMBER - IISER-PUR-0337-1

DATE : 25.7.18

S.No	Query/Clarification Sought	Clarification / Amendment
1.	Request for removal of point no 12, under General Specifications for 'PoE Access Switches' and 'Non- PoE Access Switches' (Page Nos. 21 & 28) which is - The switch should support configurable Switch-port auto-recovery (from Error Disable state)	No change, the switch should support equivalent functionality.
2.	Request for amending point no 13, under General Specifications for 'PoE Access Switches' and 'Non- PoE Access Switches' (Page Nos. 21 & 28) which is - The switch	It is clarified that the network switches which are to be supplied as a part of this tender should at least be capable of supporting discovery of devices manufactured / supplied by the same OEM. The support to CDP which is a cisco proprietary neighbor discovery protocol is preferred to ensure

	should support discovery of the neighboring device of the same vendor (preferably complaint with Cisco Discovery Protocol- CDP) giving the details about the platform, IP Address, Link connected through etc., thus helping in troubleshooting connectivity problems.	compatibility, but not mandatory.
3.	Request for removal of point no 21, under 'Management' Specifications for 'PoE Access Switches' and 'Non- PoE Access Switches' (Page Nos. 22 & 28) which is - The switch should support dedicated out-of-band management port.	Accepted. The Point No. 21 stands dropped from the specifications for 'PoE Access Switches' and 'Non- PoE Access Switches' (Page Nos. 22 & 28).
4.	Request for amending point nos. 22 & 23, under 'Management' Specifications for 'PoE Access Switches' and 'Non- PoE Access Switches' (Page Nos. 22 & 28) with proposal to include dual-personality (RJ-45 or USB micro-B) serial console port as acceptable serial management interfaces.	It is clarified that the dual-personality (RJ-45 or USB micro-B) serial console port will be treated acceptable serial management interfaces under point nos. 22 & 23.
5.	Request for removal of point no 52, under Specifications for 'Operating conditions' in 'PoE Access Switches' and 'Non- PoE Access Switches' (Page Nos. 23 & 30).	No change in tender terms & conditions. The mentioned parameters are required for "idle conditions"
6.	Request for amending point no. 53, under 'PoE / PoE+' Specifications for 'PoE Access Switches' (Page No. 23) with proposal to remove the 'Type 1 and Type 2' interfaces.	No Change in tender terms & conditions. It is clarified that 802.3at Type 1 which is 802.3af supporting 15.4 W PSE is required in addition to 30 W PSE support as per 802.3at Type 2.
7.	Request for removal of point no 59 & 54, under 'Stacking' Specifications for 'PoE	No Change in tender terms & conditions.

	Access Switches’ and ‘Non- PoE Access Switches’ respectively (Page Nos. 24 & 30) which is - Stacking module should be Hot-swappable.	It is clarified that with the OEM switches not having dedicated stack ports can acceptably use the regular high speed ports along with modules for stacking provided that the port modules should be Hot-swappable and they meet the performance parameters.
8.	Request for removal of point nos. 76,78,79 & 98 from the Specifications for ‘PoE Access Switches’ (Page Nos. 24 & 25) and Request for removal of point nos. 71,73,74 & 93 from the Specifications for ‘Non- PoE Access Switches’ (Page No. 30 & 31).	No Change in tender terms & conditions.
9.	Request for amending point nos. 83 & 78, under ‘Network security feature’ Specifications for ‘PoE Access Switches’ and ‘Non- PoE Access Switches’ respectively (Page Nos. 25 & 31) with a proposal to relax the requirement of ‘Unicast storm control’ .	No Change in tender terms & conditions. There is no Broadcast mechanism in IPv6 as in case of IPv4 hence mandatory for all IPv6 compliant devices.
10.	Point no 115 & 110, under ‘Stacking’ Specifications for ‘PoE Access Switches’ and ‘Non- PoE Access Switches’ respectively (Page Nos. 26 & 32) which is - The switch should support RFC4292/RFC4293 MIBs for IPv6 traffic.	It is clarified that RFC 4293 MIBs are also acceptable.
11.	Request for amending point nos. 133 & 128, under ‘Performance and Scalability’ Specifications for ‘PoE Access Switches’ and ‘Non- PoE Access Switches’ respectively (Page Nos. 26 & 33) with a proposal to change the term ‘etherchannel’ to ‘etherchannel or equivalent’ .	Accepted. The specification now amended as - ‘Switch should support cross-stack etherchannel or equivalent port link aggregation technology to upstream core/distribution switches & load balancing’ .

12.	Requested clarification on point No.147 under 'Compatibility with Cisco AP' Specifications for 'PoE Access Switches' (Page No. 27)	It is clarified that the switches thus supplied should minimally support operability to the Cisco make access points along with the Centralized Cisco Wireless Lan Controller (5508/ 5520) already installed in the campus.
